SUMMARY

A proactive and analytical individual with a strong passion for problem-solving and eager to learn. I approach challenges from multiple perspectives to identify the most effective and efficient solutions. Confident in communicating ideas and providing constructive input within team environments. Specifically enthusiastic about game development, I stay up to date with emerging technologies and enjoy applying industry innovations in practical, results-driven ways—both professionally and with the same curiosity I bring to gameplay.

SKILLS: Game Programming, Software Engineering, Software Construction, Object Oriented Programming, Algorithm Design, Problem Solving, C#, C++, Python, Game Architecture, Mobile Porting, Nintendo Porting and Unity Engine.

PROFESSIONAL WORK EXPERIENCES

GameChanger Studio – PT Gudang Gim Global

August 2022 – Present

Game Programmer

- Contribute to Development of My Lovely Empress with various tasks including gameplay mechanics, UI, Save System, Custom Input System for Joysticks and Editor Tools ,Porting the nintendo switch .
